(54) Title: INSULATING GLASS FASTENER

(57) Abstract: A device (1) in glass wall claddings for mounting insulating-glass sheets (12), each glass sheet (12) comprising at least two glass slabs (13, 14), which are joined together by means of a jointing substance (16), said device (1) having a first position, wherein said device (1), upon mounting of said insulating-glass sheet (12), allows the insulating-glass sheet to be placed in the desired position, and a second position, wherein the device (1) grips at least one (13) glass slab of said insulating-glass sheet (12). The device (1) comprises a retainer member (3) and an anchoring member (2). A portion of one part (4) of the anchoring member (2), which part upon mounting of an insulating-glass sheet (12), i.e. as the anchoring member (2) of the device is guided from said first position to said second position, is arranged to penetrate into said jointing substance (16) of an insulating-glass sheet (12) in response to the anchoring member (2) being tilted to said second position.
